| Node.js | UNIX Scripting |

EDUCATION

University of California San Diego La Jolla, CA

SEPT 2009 - JUN 2013

Bioengineering, B.S.

Origin Code Academy San Diego, CA

OCT 2017 - DEC 2017

Fullstack Web Development Bootcamp

PREVIOUS WORK

Sequenom Bioscience San Diego, CA

APR 2014 - OCT 2015

Product Support Engineer

Roka Bioscience La Jolla, CA

JUN 2013 - APR 2014

Research Associate

PROJECT HIGHLIGHTS

WooCRM

IN PROGRESS

- Developing a Customer Relationship Management (CRM) system for WooCommerce, allowing store owners to track, report and gain insight on online store sales, customers, and product trends.
- Building the application using React / Redux for view rendering, WooCommerce, Stripe, and Loopback APIs for managing and extending server-side endpoints, and MongoDB for database modeling.

Grub To Eat

GRUBTOEAT.HEROKUAPP.COM

- Built a concept restaurant ordering application featuring user login authentication, an order checkout process, and search results filtering via Google Maps Distance Matrix API.
- Collaborated on application development and deployment using scrum methodologies, version control, and continuous integration.
- Developed using React / Redux for view rendering, Mocha/Chai for unit testing, MongoDB for database modeling, Loopback for RESTful API design, and CircleCI with Heroku for continuous deployment.

Budgeting App

LC-BUDGETING-APP.HEROKUAPP.COM

- Built a single page budget planning app featuring graphical insights.
- Developed view components using React and Recharts.js.
