Front end developer with a previous background in biotechnology & medical devices product R&D, capable of delivering agile and elegant solutions in building web user interfaces and experiences.

TECHNICAL SKILLS

JavaScript (ES6)	MongoDB
React / Redux	Mocha / Chai
React Native	Redis
HTML	Loopback
CSS / Sass	Git
Bootstrap	Gulp
Node.js	Webpack

EDUCATION

Origin Code Academy San Diego, CA
OCT 2017 - DEC 2017
Fullstack Web Development Bootcamp

University of California San Diego La Jolla, CA
SEPT 2009 - JUN 2013
Bioengineering, B.S.

PREVIOUS WORK

Sequenom Bioscience San Diego, CA
APR 2014 - OCT 2015
Product Support Engineer

Roka Bioscience La Jolla, CA
JUN 2013 - APR 2014
Research Associate

PROJECT HIGHLIGHTS

WooCRM

- Developed an eCommerce Customer Relationship Management (CRM) platform, providing a centralized application for viewing store analytics and data on customer activity, products, and orders.
- Developed dashboard UI, converted wireframes and mockups into functional components using Sass and React+Redux, built REST APIs with Node.js, and managed data storage & caching with MongoDB and Redis.

Grub To Eat

GRUBTOEAT.HEROKUAPP.COM

- Built a concept restaurant ordering application with user login authentication, order checkout, and search results filtering through Google Maps Distance Matrix API.
- Collaborated on application development and deployment using scrum methodologies, version control, and continuous integration.
- Developed frontend components using React+Redux, Mocha/Chai for unit and end-to-end tests, MongoDB for database models, Loopback for RESTful API design, and CircleCI with Heroku for continuous deployment.

Budgeting App

LC-BUDGETING-APP.HEROKUAPP.COM

- Built a single page budget planner app with interactive graphical insights.
- Developed frontend framework with React and data visualization components with Chart.js.
